WORK EXPERIENCE

UX Designer — Jackson Laboratory, Remote

August 2022 - Present

- Serve as the primary user experience designer for the Computational Sciences department.
- Collaborate with the development team and research faculty to build an understanding of scientific workflow and primary needs of users.
- Develop and iterate wireframes based on findings from user sessions.

UX Designer — Centene, St. Louis, MO

May 2020 - August 2022

- Collaborated and facilitated sessions with business stakeholders, product teams, and other designers to improve the user journey across Centene's digital healthcare products.
- Conducted multi-method user research to determine potential solutions and test those solutions for usability.
- Succinctly communicated findings to senior business partners.
- Participated in regular design critiques to ensure alignment, quality, and personal growth.

Research & Evaluation Manager — Saint Louis Science Center, St. Louis, MO

February 2011 - April 2020

- Engaged the community in all stages of the development process for Science Center programs, exhibits, and institutional initiatives.
- Consulted on project goals and objectives to ensure alignment between project outcomes and the organization's strategic plan.
- Synthesized user data to inform the next iteration of exhibits and educational programs.
